

Driving Towards a Greener Future;

Mobile Eco Car Washing

A paramount waterless car wash experience, we keep courtesy and time efficient service, while educating the public, the importance of conserving water

All it takes is a few drops

Convenience Meets
Conservation...

Who are We?

Cleanbro Mobile Car Wash is a green company specializing in the latest waterless car washing technology across India. Developed with car owners in mind, this concept maximizes idle parking time at shopping malls, government organizations, villas, apartments, and parking areas, seamlessly integrating into their daily activities.

Waterless car washing is a revolutionary solution for 21st-century vehicle owners, and Cleanbro Car Wash brings affordable luxury car wash services directly to you. Our comprehensive services include washing and polishing, all tailored to meet your car's needs.

Specializing in waterless technology, our products are 100% environmentally safe, ensuring treated vehicle surfaces remain cleaner for longer periods. The anti-static properties

of our products repel dirt, reducing the frequency of cleaning needed per vehicle per month, thus saving time, effort, and money.

Our mission is to simplify our customers' lives by providing convenient car wash services. We prioritize quality and value, offering innovative solutions that allow our customers more time to indulge in their passions. With a professionally trained and reliable team, we guarantee maximum service at minimum cost, treating each car as if it were our own.

At Cleanbro, we save you time, money, fuel, and water with each wash. Every cleaning session not only refreshes your car's appearance but also polishes and protects it, ensuring long-lasting shine and protection.

Goal

Our Goal is to deliver an unparalleled waterless car cleaning experience to our discerning clientele, prioritizing courteous and time-efficient service. Simultaneously, we endeavor to raise awareness among the public about the critical importance of water conservation.

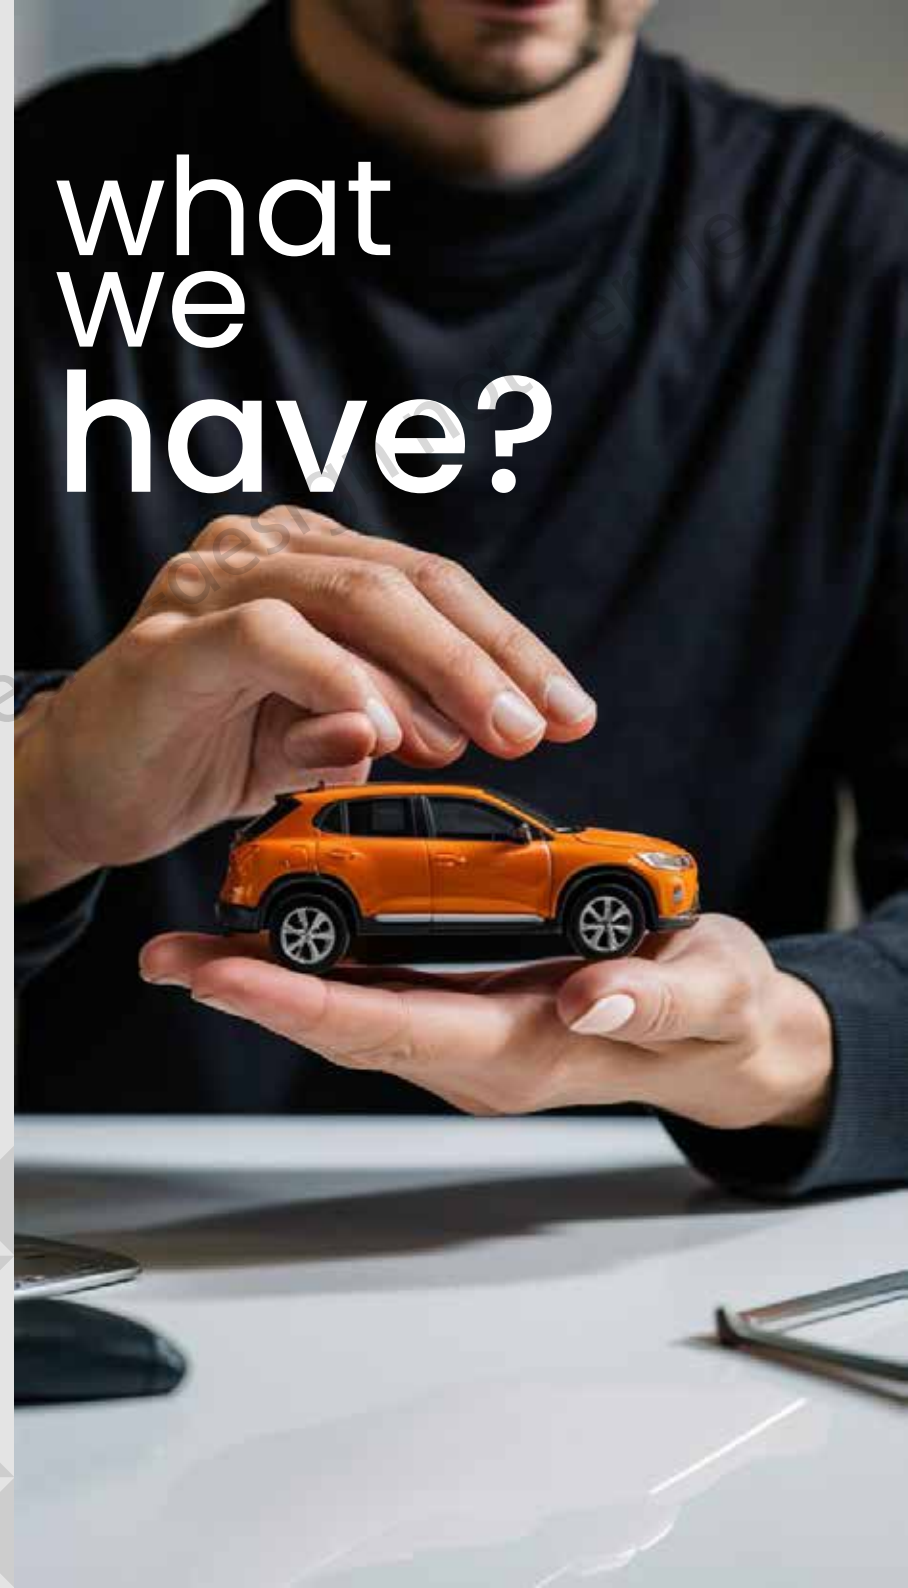

Moral

Cleanbro Mobile Car Wash is dedicated to earning recognition as a leader in the eyes of our customers, staff, and community. By offering innovative alternatives to traditional water-based car washes, we are committed to revolutionizing the car-washing industry.

Ideal

Safety, excellence, care, commitment, professionalism, innovation, collaboration, and expertise

what
we
have?

how it works?

Our biodegradable cleaning formula minimizes water and energy usage while maintaining premises cleanliness and eco-friendliness. We utilize top-quality shampoo, mixed with water, directly applied to washing, ensuring no water spills on the floor, unlike traditional methods. Our process emphasizes washing with minimal water consumption.

eco friendly

The Cleanbro mobile car washing cart is equipped with biodegradable products that pose no harm to the environment. It conserves water by utilizing only a minimal 1.5 liters of liquid, a stark contrast to the 200 liters typically used in conventional car washing systems. Our specially formulated wash product is delicately sprayed onto the vehicle, effectively lifting and encapsulating dirt. Subsequently, the encapsulated dirt is gently wiped away with a chamois leather, ensuring no scratches on the vehicle's surface. Finally, the vehicle is buffed with a microfiber cloth, leaving behind a stunning shine.

the washing cart

Cleanbro car wash operates with a sleek, compact mobile unit that maximizes space efficiency. Each cart is designed to be operated by a single person, with an average service time of just 25 minutes. Our Cleancart Washing Carts are entirely self-sufficient, eliminating the need for connections to water supplies or electricity outlets. Featuring internal compartments for clean and dirty water, they boast ample capacity to function for an entire day without requiring refills.

features

- Light Weight
- Futuristic Design
- Non-marking Wheels
- Environment Friendly
- Zero Percentage water spillage on ground

Process

The operator uses a soft duster to take the dirt off from the car that needs to be cleaned

The specially formulated wash product is sprayed on to the vehicle.

The operator uses chamois leather to clean the premixed shampoo solution and dirt from the car body.

A microfiber cloth is used to dry the water from the car body and wind screen

Finally non-bio hazardous polish is used to clean tyres.
